

The image shows three whiteboards from the Lintex brand in a minimalist room. On the left is a whiteboard on a white stand with casters. In the center is a whiteboard with a black frame on a black stand with casters. On the right is a whiteboard with a white frame on a white A-frame stand, featuring a paper pocket and pushpins. The background is a grey wall with decorative paneling, and the floor is made of light-colored wood.

Work Flow

LINTEX

In Flow. At Work.

If you've ever felt fully immersed in a feeling of energised focus, full involvement and enjoyment in the process of performing an activity, you've been in the mental state of *Flow*.

Flow is characterised by completely focused motivation. The ultimate experience of performing with a deep focus on the activity.

All Lintex products have been developed with the professional user's needs and requirements in mind. Our products aim to inspire effective communication and human interaction. To increase efficiency through visualisation and organised working.

In collaboration with established and renowned designers, we incorporate intelligent design and materials to ensure that all Lintex products reflect the highest quality and simple, timeless aesthetics.

Our ultimate goal is to put you, the user of our products, in the optimum state of mind to seek solutions, make decisions and create innovative ideas through effective communication with your colleagues.

For you to be in *Work Flow*.

NOTICEBOARDS AND CHALKBOARDS

Air Noticeboards are a stylish alternative to traditional notice boards. They have a minimalist design with bevelled edges and hidden mountings, which gives the visual impression of floating.

Air Chalkboard is a magnetic chalkboard, which also has bevelled edges and concealed mountings. Available in various sizes.

SCREENS

Edge and Zon Screens offer ultimate flexibility to create customised workplaces in any size room.

Both series divide and define the room physically and visually, enabling staff to design functional and aesthetically pleasing office environments. Available in various sizes and colours.

The Edge series also offers a noise-reducing acoustic function.

Edge Floor Screen
*With magnetic
connecting fittings*

Edge Floor Screen
*Available in
various sizes*

Edge floor screens have a simple, clean and attractive design for the flexible office. The screens effectively absorb the noise that can disturb in office environments. The screen has a 40 mm solid wood frame and a sound-absorbent filling. Built-in magnets give Edge floor screens a unique connecting function. For three and four-way connections, magnetic connecting fittings are used. A wide range of feet, edging strips and textiles in various colours are available for Edge.

PROVING FACTS **X** MAKING DECISIONS

Materials and colours

At Lintex, the manufacturing process involves an intensive preproduction phase in which the finest materials are selected and tests are carried out to simulate prolonged use.

We incorporate recycling and consideration for the environment into the development process. Rather than seeing our environmental and social responsibility as a mandatory requirement, we view it as an integral part of the design process that adds extra value to our products – enabling production, use, recycling and consideration for the environmental to form a higher synthesis.

Lintex has chosen only to use optic glass in its glass board series. Optic glass, also known as diamond glass, has a low iron oxide content. This ensures that the colour of the glass is reproduced with an intense glow and in the highest quality. Optic glass is the only glass that allows a natural and true reproduction of white and pastel colours.

We use a glass E3 enamel on our whiteboard surfaces; an environmentally friendly ceramic surface. E3 is free of environmentally hazardous heavy metals and can be recycled. The surface is impact and scratch-resistant and we provide a 30-year warranty in connection with standard use and maintenance.

Both Lintex glass products and fabric products come in a variety of standard colours, but should customers desire a particular colour to match an item of furniture, logo etc., all our products are customisable.

Every order is carefully processed to create a unique solution that combines the customer's requirements with technical details and the special aesthetics that characterise Lintex's products.

Lintex is always happy to supply further information. Please find our contact details on the back cover.
